

As of September 5, 2017, the settlement cycle for North American securities will move from the current T+3 cycle to T+2. This move will harmonize the settlement period for securities transactions across North America with Global markets. It is intended to reduce counterparty, market, and liquidity risks.

T+2 Key Dates:

- September 5, 2017- U.S, Canadian and Mexican markets will move from T+3 to T+2 settlement cycle for in-scope products.
- September 7, 2017 – Double Settlement Date: Trades booked on September 4, 2017 with a standard settlement cycle of T+3 and trades booked on September 5, 2017 using the new T+2 settlement cycle will both settle on this date. The expected impact of this item is being extensively tested within the industry and at this time is not expected to present any issues.
- Canadian Thanksgiving (Monday October 9, 2017) First holiday processing date in production
